NITESH KUMAR MISHRA

New Delhi, India +91 7982765889 mishranitesh45176@gmail.com LinkedIn GitHub Portfolio

SUMMARY

Generative AI Engineer and Full Stack Developer experienced in building AI-powered applications using LLMs, RAG pipelines, and intelligent agent workflows. Skilled in integrating AI APIs, designing scalable backend systems, and deploying production-ready AI applications.

SKILLS

Languages: Python, JavaScript, TypeScript, C++

Generative AI: LLMs, Prompt Engineering, RAG, LangChain, AI Agents, Vector Databases

Backend: FastAPI, Node.js, REST APIs

Frontend: Next.js, React.js, Tailwind CSS

Database: PostgreSQL, MongoDB, Vector Databases

Cloud & DevOps: Docker, AWS EC2, Nginx, GitHub Actions, Linux

PROJECTS

ResearchAI – Multi-Agent Research System Live — GitHub

Tech Stack: Python, FastAPI, LangChain, LangGraph, Groq, Tavily, Next.js

- Built a multi-agent AI system using Search, Reader, Writer, and Critic agents for automated research workflows.
- Integrated Tavily Search and web scraping tools to collect and process real-time web data.
- Developed LLM-based report generation and feedback pipelines using Llama 3.3 70B.
- Implemented LangGraph orchestration and exposed workflows through FastAPI APIs.
- Built a Next.js frontend for end-to-end AI research automation.

NeuraAI – AI Meeting Assistant Link — GitHub

Tech Stack: Python, FastAPI, LLM APIs, RAG, Vector Database

- Built an AI meeting assistant for transcription, summaries, action items, and key decisions.
- Developed RAG-based question answering over meeting transcripts using semantic retrieval.
- Designed modular AI pipelines for transcription, summarization, and conversational querying.
- Implemented REST APIs using FastAPI for integration between AI pipelines and frontend applications.

ResonAI – AI Voice Platform Live — GitHub

Tech Stack: Next.js, TypeScript, PostgreSQL, Docker, AWS

- Engineered an AI-powered SaaS platform with secure authentication and scalable backend architecture.
- Implemented deployment workflows using Docker, GitHub Actions, AWS EC2, and Nginx.
- Designed production-ready infrastructure supporting secure user workflows.
- Built scalable APIs and database workflows for efficient handling of user operations.

ACHIEVEMENTS & CERTIFICATIONS

- Top 50 finalist among 5000+ participants in HacToImpact Hackathon at IIIT Delhi.
- Completed Generative AI course by Krish Naik covering LLMs, RAG, and prompt engineering.

EDUCATION

Maharaja Surajmal Institute of Technology 2024 – Present
B.Tech (CGPA: 8.3) New Delhi, India

Rajkiya Pratibha Vikas Vidyalaya 2023 – 2024
Class 12th (Percentage: 83%) New Delhi, India
